Manjiri Kinage

Software Developer

9146841254 | manjirikinage2005@gmail.com | LinkedIn | GitHub | Portfolio | LeetCode | Pune, India

Professional Summary

Software Developer with hands-on experience in Python, FastAPI, Flask, SQL, and backend development. Experienced in building full-stack applications, backend services, database-driven solutions, and AI-enabled applications through projects and hackathons. Strong analytical and problem-solving skills with a focus on developing reliable software solutions, applying core programming concepts, and learning emerging technologies.

Skills

Programming Languages : Python, Java, JavaScript, SQL, C
Frameworks & Libraries : FastAPI, Flask, Next.js, SQLAlchemy, HTML5, CSS3, Tailwind CSS
Databases : PostgreSQL, MySQL, SQLite, Supabase
AI & Development : Google Gemini API, Object-Oriented Programming, Data Structures & Algorithms
Tools & Platforms : Git, GitHub, Power BI, Vercel, Render, Streamlit
Soft Skills : Problem Solving, Teamwork, Adaptability, Communication, Leadership
Languages : English, Hindi, Marathi, German (A1)

Projects

NetScan | Vulnerability Management SaaS Platform | Github

- Built a browser-based vulnerability management platform using Python and Flask for automated network discovery, open-port detection, and service fingerprinting.
- Engineered multithreaded Nmap scanning for 254 hosts on a /24 subnet with CVE/NVD-based vulnerability analysis, AI-driven remediation, and structured security reports.
- **Technologies Used :** Python, Flask, PostgreSQL, Nmap

AI Finance Controller | Full-Stack & AI Financial Automation Platform | Github | Deployed

- Built a 5-stage financial reconciliation engine integrating Razorpay payments, settlement feeds, bank statements, and accounting ledgers using exact UTR indexing, fuzzy matching, and fee/GST arithmetic tolerances, processing 10,000+ rec/sec with 100% precision and 0% false matches.
- Integrated Google Gemini LLM with function calling to automate root-cause analysis of financial anomalies, reducing manual investigation time by 80%.
- Developed a full-stack dashboard using FastAPI, Next.js, and React to visualize audit trails and predict 7-day and 30-day cash flow using bank balances and pending settlements.
- **Technologies Used :** Python, FastAPI, Next.js, Google Gemini API, Docker

SPLITZY | Expense Sharing & Settlement Platform | Github | Deployed

- Engineered a 4-mode expense splitting platform (Equal, Exact, Percentage, Itemized) featuring a Greedy Min-Cash-Flow Algorithm ($O(N \log N)$) that minimized multi-party transactions from $O(N^2)$ to at most $(N-1)$ direct settlements with integrated UPI QR payment links.
- Architected real-time cross-device data sync using Supabase (PostgreSQL) and WebSockets with Row Level Security (RLS), packaged as an offline-first Progressive Web App (PWA) with interactive Chart.js analytics and WhatsApp/CSV reporting.
- **Technologies Used :** JavaScript, Supabase, PostgreSQL, WebSockets, Chart.js

Education

PES Modern College of Engineering, Pune — **Sept 2025 – Present**
Master of Computer Applications (MCA) *CGPA: 8.8/10*

MES Abasaheb Garware College, Pune — **Aug 2022 – Apr 2025**
Bachelor of Computer Applications (BCA) *CGPA: 9.6/10*

Work Experience

Java Developer Intern | *CodSoft* — **Jul 2024 – Aug 2024**

- Developed multiple Java applications using OOP, Collections, exception handling, and file handling, focusing on modular and maintainable code.
- Implemented and debugged application features using Core Java and Java Swing.

Awards & Achievements

- First Rank Holder – BCA – CGPA 9.6/10
- Top 4 – HackSpark National Hackathon (NetScan)
- Top 10 Teams – HackOverflow National Hackathon – Built OmniX – AI copilot for hardware engineers

Certifications

The Complete Python Bootcamp, Udemy | Problem Solving (Intermediate), HackerRank | Make Data-Driven Decisions, Google | Java Training, Spoken Tutorial, IIT Bombay
